WORKING DATA FOR DEMAND ANALYSIS

The attached tables contain a number of time series frequently used in statistical demand analysis. Although these tables have been prepared by the Demand Analysis Section of the Outlook and Projections Branch, much of the data originate in other Government agencies. Some of the series, particularly those for personal and disposable income for years prior to 1929, are not published elsewhere. The current year figures are preliminary and in some instances partly estimated. The material as a whole is not for general publication and the exact status of each series can be ascertained from the appended footnotes.

These tables are revised once a year, usually in October, by the Demand Analysis Section of the Outlook and Projections Branch, Extension 4740. Since some of these data are regularly compiled by other agencies, it is suggested that current revisions of basic data, particularly the estimates of total income and expenditures of the Department of Commerce and the estimates of prices by the Bureau of Labor Statistics can best be obtained directly in publications from those agencies.

Table 1.--Population, United States

Year .	Total population January 1 <u>1/</u>	Farm population April 1 <u>2/</u>	Total population July 1 <u>1/</u>
	Thousands	Thousands	Millions
1926	116,678	30,979	117.4
1927	118,284	30,530	119.0

For footnotes, refer to last page of this series.

FOOTNOTES

1/ Includes Armed Forces overseas. Beginning 1960, includes Alaska and Hawaii. (Bureau of the Census)

2/ Farm population of the United States as of April 1; estimated jointly by ERS and the Bureau of the Census. Beginning 1941, series revised for new definition of farm population.

3/ Excluding Alaska and Hawaii, January 1, 178.6; July 1, 179.9.

4/ Excluding Alaska and Hawaii, January 1, 181.5; July 1, 182.9.

5/ Excluding Alaska and Hawaii, January 1, 184.5; July 1, 185.8

6/ Excluding Alaska and Hawaii, January 1, 187.2; July 1, 188.4.

7/ Estimates for 1927-28 by ERS.

8/ Includes Alaska and Hawaii beginning 1960.

9/ Bureau of Labor Statistics.

10/ Preliminary estimates; not for publication.

11/ Rebased to 1957-59, but weighted by 1947-49 prices. Not revised in intercensal years for 1959 Census of Agriculture changes.

12/ Data for 48 States. Includes all members of Armed Forces, 1927-40; beginning 1941 only those eating out of civilian supplies.

13/ Derived from civilian per capita consumption index.

14/ Total population for 48 States, including Armed Forces overseas.

NOTE: Several of the series in this publication include Alaska and Hawaii from 1960 to date. Allowing for the additional States makes little practical difference in using the series because the changes in national income and expenditure prices, and population are relatively small. Tables 7 and 8 do not yet include data from Alaska and Hawaii.
